

Ryan Combest

Full Stack Software Engineer

Garland, Texas | crcombest@gmail.com | [GitHub](#) | [LinkedIn](#)

Brand Statement: I am a user-focused Software Engineer who brings humor and empathy to everything I do. I have a passion for the backend and seek to bring creative and technical finesse with every post request.

SKILLS

- Languages: JavaScript, HTML, CSS and Python
- Frameworks: Express, Django, and React
- Databases: MongoDB and PostgreSQL
- Tools: Azure, Bootstrap, Mongoose, and Node

RELEVANT EXPERIENCE

Software Engineering Immersive | General Assembly | Remote | August 2022 – November 2022

Successfully completed 500+ hours of expert led instruction in JavaScript, the MEN/MERN stack, Python and hands on learning of CSS and HTML fundamentals and the industry's most in demand technologies. Developed projects, including:

- Cool-Nect Four: Built with JavaScript, CSS, HTML, Bootstrap, Animate.CSS and a GitHub library—A quick fun game of the Connect Four you know and love with an exciting twist using dark mode functionality. [\[GitHub Repository\]](#) [\[Deployed Link\]](#)
- Only-Bands: Built using Azure, JavaScript, CSS, EJS, Google OAuth, MongoDB and the MEN stack, Only-Bands is a family friendly, entirely Safe For Work application that allows users to sign in using Google OAuth and share their current favorite songs and artists with other users, as well as create a list of all time favorite albums and bands on their profile and view other users favorites lists on their profiles. [\[GitHub Repository\]](#) [\[Deployed Link\]](#)
- Relocate: Built using Azure, CSS, HTML, JavaScript, MongoDB, MUI, and the MERN stack in collaboration with [Stephanie Michael](#) and [Zeus Zaragoza-Gildo](#), Relocate is an app that seeks to make moving easier and give users peace of mind throughout the moving process. Users are able to create a profile and create, read, update, and delete to-do lists and their individual items as well as create, read, update, and delete wishlists and wishlist items. Users are also able to add images of and links to their wishlist items. [\[Backend GitHub Repository\]](#) [\[Frontend GitHub Repository\]](#) [\[Deployed Link\]](#)

Serenity | The Granada Theater | Dallas | Sep '19 - Current

- Maintain cleanliness of the theater and property through both pre and post show clean up duties.
- Ensure guests enjoy a friendly and safe environment throughout the night by checking bags, ID's and assisting guests who need help finding seats, bathrooms, and exits.
- Maintain a respectful environment through conflict mediation in the event of a verbal altercation between guests, and if necessary requesting one or both parties exit the venue if the situation

escalates further, as well as removing a guest or calling the police if they become belligerent or aggressive and pose a danger to other guests or staff.

Receptionist | Perimeter Behavioral Hospital | Garland | Aug '21 - Jan '22

- Performed both opening and closing duties for front desk up to and including: wiping down/disinfecting items used by staff and patients day-to-day, logging the previous days guest and staff sign-in sheets and temperature logs in keeping with the hospitals covid procedures, taking guest and staff temperatures upon entry, making sure the front desk is stocked with spare masks and PPE, setting out new sign-in sheets and temperature logs at EoD, ensuring all patient belongings are logged, received, and delivered to intake for distribution by the patient's nurse.
- Assisting patients and their families, as well as EMT's and/or LEO's if present, with the sign-in process by providing information regarding visitation, informing them of policies regarding patient belongings, covid protocols, general information about the hospital and the average length of the in-patient program, providing points of contact for their patient, as well as collecting patient insurance information, assisting with any questions regarding paperwork, and ensuring the safety of all patients and staff in the intake area by collecting any and all personal belongings prior to being escorted to intake for their assessment.
- Taking patient vitals in the event the patient arrives via EMT or supply LEO's with APPOW forms if the patient arrives via police escort or in custody.
- Ensuring the confidentiality of documented patient information in the lobby by keeping it out of plain sight at the desk and ensuring all necessary documents are taken to intake, and/or appropriately logged and put away at reception.
- Screening calls to ensure only those with a patient's ID number are redirected to the units for the nurses to further screen the call in order to ensure only those with express written consent from the patient and/or guardian are able to contact the patient.
- Going through patient belongings with parents/guardians to determine what would and would not be allowed onto the unit
- Tracking down any belongings that did not make it to the patient after being received and documented and putting the parent/guardian in contact with the hospital's patient advocate if unable to locate.
- Providing parents and guardians a listening ear and space free of judgment to talk through their own anxieties regarding whatever events may have brought them/their patient to seek treatment with us.
- Calling codes in the event one needs to be called in the lobby.
- Receiving medication deliveries and notifying the house supervisor or pharmacist upon their delivery
- Collecting any samples ready to be picked up by LabCorp upon their arrival

Warehouse Shipping/Receiving Clerk | Multimedia Solutions Inc. | Farmers Branch | Mar '17 - Sep '19

- Promoted from A/V equipment delivery to Shipping/Receiving due to exemplary performance within the warehouse.

- Oversaw the organization of the warehouse and implementation of its first inventory system, resulting in an expedited process for crews leaving for job-sites in the morning, and shipping/receiving throughout the day.
- Accomplished daily warehouse maintenance resulting in a cleaner, more organized, and effective warehouse.
- Accomplished better overall communication between the warehouse, sales-team, crews, leads, and scheduling department by working to maintain open lines of communication across all parties with regards to the shipping, receiving, or personal delivery of equipment
